

COLD MIX ASPHALT

Fill it with RAP and fix it with sunshine.

Invigorate[®]
Plus

Invigorate[®] Plus pothole mix is a fill-and-fix solution with a simple three-step process: 1) throw the mix and some millings into a pugmill or drum mixer 2) tamp the new mixture into the pothole, and 3) let sunshine, or another source of UV light, cure the patch. With the way this mix works at cool temperatures, crews don't have to rush around all day. Just keep it out of the sun and it'll be ready when needed.

Patch potholes
in just three
simple steps.

Extend the season
with no heat
needed to cure.

Use 100% RAP
to cut costs and
reduce footprint.

Mix millings with
100% bio-based
content.

Get a fresh look
with black colorant
already in the mix.
