

Six tote mixing best practices

from the experts in everything
mulch colorant.

- 1 Practice first-in, first-out inventory management.**
- 2 Prolong shelf life with proper storage.**
 - Keep product out of direct sunlight.
 - Do not allow product to freeze.
- 3 Maintain the condition of your tote mixer.**
 - Look at shaft alignment —it shouldn't be bent.
 - Make sure the blades are free to move.
 - Ensure the mixer is securely fastened to the tote.
- 4 Choose the correct blade placement.**
 - **330-gallon Tote**
Move blades down to the bottom of the shaft.
 - **275-gallon Tote**
Blades should be placed in a higher position on the shaft.
- 5 Check blades for clockwise rotation.**
 - Because blades won't extend when rotating counterclockwise.
- 6 Know when it's time to mix product. And when it's time to stop.**
 - **60 minutes.** That's how long product should be mixed prior to use.
 - **4 months.** That's how often product should be mixed in extended storage.
 - **12 inches.** That's how low the colorant level can reach before the mixer should be stopped.
